Instructions

^ COLLAPSE ^

Overview Video: https://youtu.be/3pDB8m62tgM

1. Create a repository on github, use the format `ucid-course-section` as the repository name.
2. Make sure it's set to private
3. Go to Settings -> Manage Access -> Invite Collaborator -> Search for my ID **MattToegel** and send an invite; if your section has a grader do the same for their github username (refer to course announcements)
   1. **Note**: Once in a while the invite doesn't get created correctly and you'll need to resend it, keep an eye on the acceptance of the invite since this is required for further HW validations. A comment will be left on Canvas for the submission if the invite is missing at the time of grading).
4. From the terminal / command line create a new branch called **M1-GettingStarted**
5. Create a README.md file and add it to the branch
6. Fill in some basic details:
   1. Course/Section
   2. Your name (first is fine)
   3. Brief info about yourself you'd like to share
7. Hint after creating the file
   1. `git add README.md`
   2. `git commit -m "my readme file"`
   3. `git push origin M1-GettingStarted`
   4. Create a pull request from this branch (via github.com)
   5. Don't merge/close the pull request yet
8. Fill in the below deliverables.
9. Once finished, ensure it's saved and click the "Export" button.
10. Move the generated PDF into your local repository folder at any location of your choosing.

11. Do the following commands
    1. `git add .` (this will add all changes)
    2. `git commit -m "adding output file"`
    3. `git push origin M1-GettingStarted`
12. Go back to github and merge the pull request that was opened
13. Go to Canvas and upload the same PDF that you just downloaded and pushed to GitHub

Note: Having the submission saved and active keeps it eligible for grading.

**Branch name:** M1-GettingStarted

Tasks: 4 Points: 10.00

● IDE Setup Evidence (2 pts.)
∧COLLAPSE∧

●
∧COLLAPSE∧

Task #1 - Points: 1
Text: Required Extensions
#1) Show the PHP Extension

Caption (required) ✓
Describe/highlight what's being shown
The correct PHP extension is installed

**#2) Show WakaTime Installed and**

Caption (required) ✓
Describe/highlight what's being shown

Caption (required) ✓
Describe/highlight what's being shown
The correct MySQL extension is installed

#4) Show the MySQL Side Panel

Caption (required) ✓
Describe/highlight what's being shown
MySQL is connected and it's side panel shows my ucid "dr475"

● Reflection (6 pts.)
∧COLLAPSE∧

●
∧COLLAPSE∧

Task #1 - Points: 1
Text: Talk about what you learned during this module, anything interesting, new, etc.

ℹ Details:
Should be at least a few sentences for full credit

Response:

The WakaTime extension is new to me and interesting! I am a fan of how in depth WakaTime tracking goes, from what language was used, to how long I spent on a project, etc. I don't install many plugins for VSCode, despite using it extensively for CS490 + CS491 in collaborative environments, so maybe I should start...

● ^COLLAPSE^

Task #2 - Points: 1

Text: Did you have any issues? If so, how did you resolve them? If no issues, just type "no issues"

Response:

No issues

● ^COLLAPSE^

Pull Request (2 pts.)

● ^COLLAPSE^

Task #1 - Points: 1

Text: Add the pull request link here (it should end in /pull/#)

URL #1
https://github.com/davidredziniak/dr475-IT202-452-M2024/pull/1
